

We have hard and salty water from our bore here and we thought we were stuck with it. Jeff did a water test for us, and he told us he could make a difference. I have to say that I didn't really believe this but he said he'd give us our money back if it didn't work. He even brought it out and showed us the best place to put it.

Well, what a difference it made! We used to have ^{to} use Dove in the shower because ordinary soap didn't lather. And we used to feel itchy afterwards. All of that changed. And there are no more white marks on the screens and on the stainless steel sink. And even the plants in the garden grew better. There were new shoots on all the fruit trees. The custard apple didn't like the salt in the water but now it's blooming with life.

I couldn't recommend this product and Jeff Harvie more highly. In fact I've been telling everyone around here and they can all see the difference.
